

The Lightweight EHR Solution for Labs

Simple, powerful and built to meet your needs

Primary.Health

Primary provides a cost effective and agile EHR solution with a user-friendly, simple and secure front-end. Our software allows participants to easily self-enroll, including those outside of an established patient population.

Why Choose Primary?

Our lightweight EHR provides digital registration and consent in the field. This enables community partners and staffing partners to work in tandem with clinicians in one platform, **without any user based cost.**
