# Be a Wellness Innovator Through COVID and Flu Solutions

For more information, visit [Primary.Health](https://Primary.Health)

595 Pacific Ave 4th Floor, San Francisco, CA 94133  
1-855-970-0077

## The Challenge

It's not going to get easier for your employees when COVID and flu seasons collide. Are they coming down with COVID? Is it the flu? Something else? Taking proactive steps to protect employees and their families ahead of increasing flu rates sends a powerful message. Through recent advancements in testing, employees can discover if they have COVID or flu before symptoms fully emerge, and stay home while they are infectious, potentially sparing hundreds from the spread. You can elevate your brand and increase productivity by bringing innovative COVID and flu solutions to your workforce.

The cost to U.S. employers for workers who are out with COVID-19 and flu is estimated to be \$100 billion during the past two years. Flu-season alone leads to U.S. employees taking an estimated 80 million sick days. - Studies by [Integrated Benefits Institute](#) and [Challenger, Gray and Christmas](#).

## Key Capabilities

- Preventative Care and Testing Program Design and Administration
- Diagnostics, including Multiplex test for COVID and flu
- Diagnostic Sourcing, Procurement and Fulfillment
- Lab Diagnostics Services
- Public Health Reporting
- Vaccination Program Support and Tracking
- Health Diagnostics Analytics and Reporting

- Long-term partner for continuous wellness innovation
- Fully HIPAA-compliant
- Works on any smartphone, tablet, or computer
- Live customer/client support
- 24+ language options
- Mission-driven to promote health equity

## Who We Are

Primary.Health was born of a volunteer effort in a little California town to protect the health of one community, and we have grown into a company committed to protecting the health of every community through easy and affordable access to diagnostics. We provide program management software and program design services that let employers, schools and communities administer testing to comply with government guidelines and follow the recommendations of healthcare professionals. Through our work with the largest, most complex organizations at the height of the pandemic, Primary has earned the experience and trust to provide superior diagnostic testing for COVID-19, flu and other conditions that threaten population health.
