

## Product Overview:

# Testing and vaccinations for community pharmacies

## Becoming the cornerstone of community care

Pharmacies play an essential role in community care given that 89% of Americans live within 5 miles of one. Community pharmacies can have an even greater impact by adding **point of care testing (POCT)** and vaccination services. Primary Health's platform is the easiest and most affordable way for independent pharmacies to scale and succeed with POCT. It has all the key features you need such as patient scheduling, intake, diagnostic workflow, and reporting.

Scan the QR or email us at [bd-enterprise@primary.health](mailto:bd-enterprise@primary.health) to learn more.

## Key Capabilities

- **White-label scheduling experience** - Multilingual appointment scheduling with SMS and voicemail reminders.
- **Intake** - Template and custom questionnaires to capture patient info prior to visit. Integration with existing systems.
- **Simple diagnostic workflows** - Step by step guides walk administrators through supported diagnostics.
- **Training verification** - Custom training questionnaires ensure staff is trained prior to administering tests and vaccines.
- **ePrescribe** - Streamlined provider services to fulfill prescriptions. Optional clinical provider services.
- **Reporting** - Automated utilization and state-required reporting.
- **Administrative support** - Support for collaborative practice agreements (CPAs) and clinical laboratory improvement amendments (CLIA) waivers.

## Key Benefits

- Deepen relationships with patients and have a greater impact on their health
- Differentiate your business through a valuable new revenue stream
- Get started quickly in just a few days with zero financial risk
- Support for any menu of POCT tests with the ability to add more over time

## ✓ Join the charter program

Members of Primary's Pharmacy Charter Program receive complimentary access to Primary.Health's platform and account management support. All members have to do is provide feedback on their experience using the platform.

## Who We Are

Primary.Health is powering the decentralization of care in public health. With access to easy and affordable diagnostics, we help community leaders to reduce administrative burden, automate clinical workflows, and integrate with the healthcare ecosystem. We provide program management software and program design services enabling employers, schools, and communities to remain safe and healthy. We power 10,000 sites across the U.S. and have helped to administer 14 million tests and 1.6 million vaccines. Through work with the largest, most complex organizations at the height of the pandemic, we have earned the experience and trust to provide superior diagnostic testing for flu, COVID-19, STI, HIV, RSV, and other conditions that threaten population health.

## Why Choose Primary.Health

- **Scalable:** 13 million tests administered through our platform.
- **Integrations:** Proven ability to integrate with healthcare systems such as labs and electronic health record systems (EHRs).
- **Partnerships:** We work with several of the largest public health departments in the country.
- **Secure:** Fully HIPAA-compliant and HITRUST Certified.
- Mission-driven to promote health equity.
